It has been called the oldest working Christian monastery and the smallest diocese in the world. The Chapel of the Burning Bush was originally ordered built by Empress Helen, the mother of Constantine the Great, but the monastery itself was actually built by Emperor Justinian to protect the monks in the region and to honor the site of the Burning Bush. St. Catherine, whose body was reportedly carried away by angels, was discovered five hundred years later at the top of the peak that now bears her name. Her relics are stored in a marble reliquary in the Basilica. We have additional pictures of this church, and of its interior.
